

STRICTLY EQUINE. THE HEALTHY DECISION.

Uni Flex

Uni Flex is a pure Glucosamine Supplement. Glucosamine is believed to keep joints and cartilage lubricated. It also stimulates glycosaminoglycans, (the substance necessary for the formation of joint tissue.) This is important because as a horse's body ages or is subjected to work and exercise, it may not produce a sufficient amount of glucosamine naturally. This can result in cartilage with a diminished ability to act as a shock absorber.

Degenerative joint disease is a natural progression of aging, affecting all horses and characterized by a reduction in the cartilage which is the gelatinous matrix in between Glucosamine is an amino sugars provides a major building block for cartilage generation.

Uni Flex provides excellent joint support, helping to reduce the onset of degenerative joint disease, improve mobility and recovery from joint injuries.

Uni Flex will help improve joint health and reduce the onset of age-related arthritis and promote healing and recovery from joint injuries. Uni flex is an easy to administer concentrated source of cartilage building glucosamine and can be given individually or in combination with MSM, Devil's Claw or B Comfortable.

Glucosamine hydrochloride 2125mg/25gr

25 - 50g daily as required (1 scoop is approximately 30 grams)

Available Sizes:

1 KG

4 KG
