

## Golden Horseshoe Product Collection

# Multi Flex

Our most complete joint supplement available! Contains Glucosamine, Chondroitin, MSM, DMG, Vitamin E, Vitamin C and Calcium. Each 27g contains 10100mg of Glucosamine HCl, 11000mg of MSM, 500 mg of Chondroitin, 1250mg of DMG, 1100 IU of Vitamin E, 500mg of Calcium Carbonate and 3000mg of Vitamin C

Multi-flex is our best-kept secret. Armed with Glucosamine and Chondroitin, the building blocks of cartilage, along with MSM, Vitamin C, E and DMG, Multi-flex provides anti-inflammatory and antioxidant benefits, improving joint health, enhancing tissue repair, as well as reducing muscle and tendon soreness from hard training, competition, injury, age-related arthritis and Epiphysitis.

Multi-flex is an excellent source of Methyl Sulphonyl Methane (MSM), a naturally occurring Sulphur compound that is easily assimilated. Sulfur enables all cells to produce the protein required for many biological processes by forming the disulfide bonds that bind the individual amino acids together. Cells will be able to differentiate and produce the various proteins such as hair, skin, hooves, connective tissue, cartilage, bone, tendon, ligaments, hormones, enzymes and many neurotransmitters.

Sulfur ensures the production of the strong collagen fibers, enabling cartilage to withstand the compression and strain of everyday training. Sulfur also has a critical role in proper digestion, central nervous function, hormone regulation, and many enzyme functions.

With the inclusion of MSM, Vitamin C, and DMG, Multi-flex increases production of glutathione (GSH), a powerful antioxidant, helping to neutralize oxidative damage and inflammation.

For regular training or competition, Multi-flex will provide all around benefits to enhance recovery reduce soreness and improve joint mobility.
