Reg. no: 29983 P.C.P Act/No D'enregistrement 29983 L.P.A

Tick End is a convenient travel sized Flea and Tick spray for use on dogs and cats following exposure to Fleas, Ticks and high risk areas.

Fast-acting Pyrethrin plus Piperonyl Butoxide kills fleas and ticks on contact while the residual product stays on the animal and provides repellant protection. Spray the animal starting at the tail working your way over the entire body, including the underbelly. For spot treatment of infested household areas, spray thoroughly on and around the infested areas, wash and replace bedding.
