The Netherlands

The Netherlands has fewer traffic accidents than many other countries. Several methods are used in Netherlands to reduce the number of traffic accidents. For example, speed limits are low, and the police use video cameras to catch people who are driving too fast. Also, there are various programs to teach children about road safety.

1. What is one way that the Netherlands has reduced the number of traffic accidents?

2. What is another way the Netherlands has reduced traffic accidents?

3. How do children learn about traffic safety?
