Better Stations

These days in Japan, using trains is becoming safer and more convenient. Many stations have elevators and escalators for passengers. Some stations put safety gates along the platforms, and by doing so they keep people from falling onto the tracks. In this way, they are making their services better.

1. Using trains is becoming _____ and more convenient.
2. Many stations have _____ and escalators.
3. Some stations put safety gates along the _____.
4. They keep people from _____ onto the tracks.
5. How do some stations keep people from falling onto the tracks?
