

# **BIG PINE COMMUNITY SERVICES DISTRICT**

## WATER MAIN SHUT-OFF VALVE POLICY

The water shut-off valves to the water source for your property belong to the Big Pine Community Services District (District). Property owners and/or renters are not permitted to shut off the water using the District's valves.

All property owners should have their own water shut-off valve installed for purposes of checking for leaks and/or breaks. A plumber can do the installation for you.

If the District valve is used, and broken in the process, there will be a minimum charge of \$500.00 to replace the shut-off valve.
