

NEW COURSE

KATRINA M SANDERS RDH, BSDH, M.ED RF PRESENTS:

Post COVID-19: Novel Ideas in Disease Prevention

Our world will never be the same.

As society grasps onto its new realities, as the community adapts to new societal norms and as the world slowly begins to repair itself from the viral plague of COVID-19, it becomes wildly important for dentistry evaluate the intricate role it must play in preventing the spread of disease.

Join Katrina Sanders in this engaging program as she navigates the dental industry through the aftermath of these unprecedented times, discussing accommodations in infection control, pivotal changes to inflammatory protocols, and optimized patient care standards. Don't leave your infection control standards up in the air!

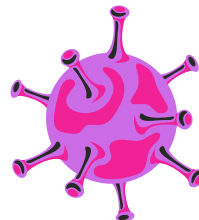

"Her ideas are novel, her laughter is contagious and her energy is infectious!"
