PROCEEDS FROM THE SHOW HELP SUPPORT GETTING A DIABETIC ALERT DOG

Flyer Downloaded from

Casey Seitles, 8 years old, was diagnosed with type 1 diabetes (T1) 2.5 years ago. This is a chronic, unpredictable, and complicated autoimmune disease affecting his health and safety 24-7. The diabetes technology today, while amazing, is not foolproof. Casey has still confronted life threatening emergencies as well as extreme hypo -and hyperglycemia. To further improve Casey's health, safety, and overall well-being his family is getting him a special companion, a diabetic alert dog named Elvis.
