

ICE COLD TOWELS

Ice Cold Towels are “cooling towels” that work on the principle of “hyper evaporation”. The towel needs to be dampened with water & shaken. Instantly the water begins to evaporate. In nature, water evaporates at approximately 20 degrees cooler than the air temperature. Our towels are chemical free, re-usable & hand or machine washable. Generally the towels stay cool for 2-4 hours. Occasionally the towel needs to be shaken. When the towel begins to dry out, simply re-wet in any temperature water.

The “Marathon” Towel 7”x31” w/tie slit
Stock Color; Blue

Extra Large Cooling Towel 16”x25”
Stock Colors; Blue, Pink

Ice Cold Towels are manufactured to our exact specifications in China. We can customize the product in many ways. The size, shape, color and packaging are all very flexible. Below are a few unique colors & options for you to consider. Custom orders generally take 35-45 day to complete and require full payment upon approval. Custom colors; purple, yellow, green & orange. We can customize the labeling & for larger quantities (1,000+) the towel logo.
