

Intelligent Technology to Support Your Unique Business Offering

Supplies Fulfillment

- View exact consumable levels remotely: toner, fusers, drums, and maintenance kits
- Ensure your cartridges are being used by tracking the unique serial number on the chip
- Set automated alerts for customized low toner levels

Maintenance and Servicing

- Set automated service alerts
- Set proactive service flags/reminders

Asset Management and Consulting

- Generate comprehensive reports

Bringing Valuable Business Intelligence to Your Clients

AXESS provides a powerful tool to generate business intelligence reports for your clients. You can provide access to the real data your customers need to take control of their printing. The AXESS technology keeps a historical database of printing information, which can be used to help customize a print management plan that works for each client's unique needs.
