

MSE Expands Cartridge Welding

CHATSWORTH, CA – MSE expands their patented ultrasonic cartridge welding technologies to include the HP 4200, HP 4300 and HP 4600. MSE now operates ten welders which can weld more than eighteen models.

According to Avi Wazana, CEO, “Cartridge welding has tremendous benefits. It not only makes our products look better, it dramatically enhances cartridge quality and reliability. Our engineers studied the challenge of proper mag-sealing blade alignment and came up with a solution. Because standard cartridge clips are unable to stabilize certain models, we decided to take it further. It’s our commitment to quality”

In conjunction with patented welding technologies, MSE has developed complementary splitting equipment that does not remove plastic and keeps alignment pins in place. These complete splitting and sealing systems are developed for each new welded cartridge MSE introduces. By doing so, MSE achieves exact mag-sealing blade alignment and MSE cartridges actually fit better in the machine. MSE welded cartridges provide even print densities across the page and this process eliminates leaking.

“Cartridge welding is no longer an option,” says Yoel Wazana, President. “We’ve found that the standard method to remanufacture some of the newer cartridges has some inherent flaws. By using blades to cut open these cartridges, the tolerances between internal components changes. This dramatically affects print quality. Our machine shop designed and built a proprietary splitting machine that does not remove plastic which allows us to re-weld them. It’s thinking outside the box that makes our products better”

Micro Solutions Enterprises (MSE) manufactures and distributes a full line of compatible toner cartridges, inkjets, and thermal transfer ribbons that are backed by award winning support. With production capacity of over 90,000 toner cartridges per month and over 100 engines, MSE is ready to serve you. Additionally, MSE carries full inventory on the West and East Coast, as well as Canada and Mexico.

MSE offers full solutions for outsourcing, private label, private packaging, and blind drop shipping. The company now offers sales training, in-house marketing and e-commerce solutions to help you grow your business.
