Conventional Control Panels

CCD-100 Series

DETNOV's CAD-100 conventional fire panel range has been EN54-2 and EN54-4 approved and was designed to fulfil all the requirements of small and medium installations.

The CCD-100 family is ideal for protecting small and medium-sized areas such us schools, shopping centres, industry buildings and car parks, among others, due to its easy installation and simplicity.

Main features

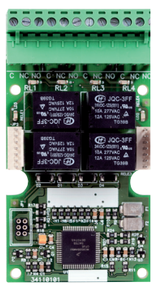
- Free contact relay output for alarm
- Free contact relay output for fault
- Two supervised sounder outputs
- Sounder delay configuration
- 24V auxiliary output
- 24V resettable output
- External input
- Test mode with auto-reset function
- Multi-language keyboard

Models

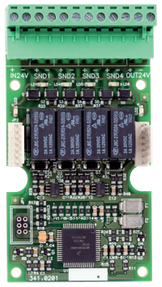
CCD-102	2 zones conventional control panel
CCD-104	4 zones conventional control panel
CCD-108	8 zones conventional control panel
CCD-112	12 zones conventional control panel

Conventional Systems

Expansion Cards



TRD-100



TSD-100

TRD-100	4 free contact relay outputs expansion card
TSD-100	4 supervised outputs expansion card
TMD-100	Modbus integration card

Conventional Detectors

200 series

The new conventional detectors of the 200 series have been developed using the latest technological advances.

Its innovative design makes the product range one of the most elegant on the market, and it is also ideal for installations where the balance between functionality and aesthetics is needed.

Main features

- Two wires without polarity
- Remote indicator output.
- CPD Certified

Heat Detectors
- Rise-of-rate function.

Optical Detector
- Dust compensation
- Protected against dust and insects

Models

Conventional Detectors

DTD-210	Heat Conventional Detector
DTD-215	High Heat Conventional Detector
DOD-220	Optical Conventional Detector
DOTD-230	Optical- Heat Conventional Detector
